

Mohawk Software Session Handler Functions

Introduction

msession is an interface to a high speed session daemon which can run either locally or remotely. It is designed to provide consistent session management for a PHP web farm. More Information about msession and the session server software itself can be found at » <http://www.mohawksoft.org/?q=node/8>.

Note
This extension is not available on Windows platforms.

Note
This extension has been moved to the » PECL repository and is no longer bundled with PHP as of PHP 5.1.3.

Installing/Configuring

Requirements

No external libraries are needed to build this extension.

Installation

To enable Msession support configure PHP `--with-msession[=DIR]`, where *DIR* is the Msession install directory.

Runtime Configuration

This extension has no configuration directives defined in *php.ini*.

Resource Types

This extension has no resource types defined.

Predefined Constants

This extension has no constants defined.

Msession Functions

msession_connect

msession_connect -- Connect to msession server

Description

bool **msession_connect** (string \$host, string \$port)

Warning
This function is currently not documented; only its argument list is available.

msession_count

msession_count -- Get session count

Description

int **msession_count** (void)

Warning
This function is currently not documented; only its argument list is available.

msession_create

msession_create -- Create a session

Description

bool **msession_create** (string \$session, string \$classname, string \$data)

Warning
This function is currently not documented; only its argument list is available.

msession_destroy

msession_destroy -- Destroy a session

Description

bool **msession_destroy** (string \$name)

Warning
This function is currently not documented; only its argument list is available.

msession_disconnect

msession_disconnect -- Close connection to msession server

Description

`void msession_disconnect (void)`

Warning
This function is currently not documented; only its argument list is available.

msession_find

msession_find -- Find all sessions with name and value

Description

array **msession_find** (string \$name, string \$value)

Warning
This function is currently not documented; only its argument list is available.

msession_get_array

msession_get_array -- Get array of msession variables

Description

array **msession_get_array** (string \$session)

Warning
This function is currently not documented; only its argument list is available.

msession_get_data

msession_get_data -- Get data session unstructured data

Description

string **msession_get_data** (string *\$session*)

Warning
This function is currently not documented; only its argument list is available.

msession_get

msession_get -- Get value from session

Description

string **msession_get** (string \$session, string \$name, string \$value)

Warning
This function is currently not documented; only its argument list is available.

msession_inc

msession_inc -- Increment value in session

Description

string **msession_inc** (string *\$session*, string *\$name*)

Warning
This function is currently not documented; only its argument list is available.

msession_list

msession_list -- List all sessions

Description

array **msession_list** (void)

Warning
This function is currently not documented; only its argument list is available.

msession_listvar

msession_listvar -- List sessions with variable

Description

array **msession_listvar** (string *\$name*)

Used for searching sessions with common attributes.

Parameters

name

The name being searched.

Return Values

Returns an associative array of value/session for all sessions with a variable named *name*.

msession_lock

msession_lock -- Lock a session

Description

int **msession_lock** (string \$name)

Warning
This function is currently not documented; only its argument list is available.

msession_plugin

msession_plugin -- Call an escape function within the msession personality plugin

Description

string **msession_plugin** (string \$session, string \$val [, string \$param])

Warning
This function is currently not documented; only its argument list is available.

msession_randstr

msession_randstr -- Get random string

Description

string **msession_randstr** (int \$param)

Warning
This function is currently not documented; only its argument list is available.

msession_set_array

msession_set_array -- Set msession variables from an array

Description

void msession_set_array (string \$session, array \$tuples)

Warning
This function is currently not documented; only its argument list is available.

msession_set_data

msession_set_data -- Set data session unstructured data

Description

bool **msession_set_data** (string \$session, string \$value)

Warning
This function is currently not documented; only its argument list is available.

msession_set

msession_set -- Set value in session

Description

bool **msession_set** (string \$session, string \$name, string \$value)

Warning
This function is currently not documented; only its argument list is available.

msession_timeout

msession_timeout -- Set/get session timeout

Description

int **msession_timeout** (string \$session [, int \$param])

Warning
This function is currently not documented; only its argument list is available.

msession_uniq

msession_uniq -- Get unique id

Description

string **msession_uniq** (int \$param, string \$classname, string \$data)

Warning
This function is currently not documented; only its argument list is available.

msession_unlock

msession_unlock -- Unlock a session

Description

int **msession_unlock** (string \$session, int \$key)

Warning
This function is currently not documented; only its argument list is available.
