

vpopmail

Introduction

Warning
This extension is <i>EXPERIMENTAL</i> . The behaviour of this extension?including the names of its functions and any other documentation surrounding this extension?may change without notice in a future release of PHP. This extension should be used at your own risk.

This extension has been moved from PHP as of PHP 4.3.0 and now vpopmail lives in [» PECL](#).

Installing/Configuring

Requirements

No external libraries are needed to build this extension.

Installation

As of PHP 4, these functions are only available if PHP was configured with *--with-vpopmail[=DIR]*.

Runtime Configuration

This extension has no configuration directives defined in *php.ini*.

Resource Types

This extension has no resource types defined.

Predefined Constants

This extension has no constants defined.

vpopmail Functions

vpopmail_add_alias_domain_ex

vpopmail_add_alias_domain_ex -- Add alias to an existing virtual domain

Description

bool **vpopmail_add_alias_domain_ex** (string \$olddomain, string \$newdomain)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_add_alias_domain

vpopmail_add_alias_domain -- Add an alias for a virtual domain

Description

bool **vpopmail_add_alias_domain** (string \$domain, string \$aliasdomain)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_add_domain_ex

vpopmail_add_domain_ex -- Add a new virtual domain

Description

bool **vpopmail_add_domain_ex** (string \$domain, string \$passwd [, string \$quota [, string \$bounce [, bool \$apop]]])

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_add_domain

vpopmail_add_domain -- Add a new virtual domain

Description

bool **vpopmail_add_domain** (string \$domain, string \$dir, int \$uid, int \$gid)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_add_user

vpopmail_add_user -- Add a new user to the specified virtual domain

Description

```
bool vpopmail_add_user ( string $user, string $domain, string $password [, string $gecos  
[, bool $apop ] ] )
```

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_alias_add

vpopmail_alias_add -- Insert a virtual alias

Description

bool **vpopmail_alias_add** (string \$user, string \$domain, string \$alias)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_alias_del_domain

vpopmail_alias_del_domain -- Deletes all virtual aliases of a domain

Description

bool **vpopmail_alias_del_domain** (string `$domain`)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_alias_del

vpopmail_alias_del -- Deletes all virtual aliases of a user

Description

bool **vpopmail_alias_del** (string `$user`, string `$domain`)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_alias_get_all

vpopmail_alias_get_all -- Get all lines of an alias for a domain

Description

array **vpopmail_alias_get_all** (string `$domain`)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_alias_get

vpopmail_alias_get -- Get all lines of an alias for a domain

Description

array **vpopmail_alias_get** (string *\$alias*, string *\$domain*)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_auth_user

vpopmail_auth_user -- Attempt to validate a username/domain/password

Description

```
bool vpopmail_auth_user ( string $user, string $domain, string $password [, string $apop  
])
```

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_del_domain_ex

vpopmail_del_domain_ex -- Delete a virtual domain

Description

bool **vpopmail_del_domain_ex** (string `$domain`)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_del_domain

vpopmail_del_domain -- Delete a virtual domain

Description

bool **vpopmail_del_domain** (string \$domain)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_del_user

vpopmail_del_user -- Delete a user from a virtual domain

Description

bool **vpopmail_del_user** (string \$user, string \$domain)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_error

vpopmail_error -- Get text message for last vpopmail error

Description

string **vpopmail_error** (void)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_passwd

vpopmail_passwd -- Change a virtual user's password

Description

bool **vpopmail_passwd** (string \$user, string \$domain, string \$password [, bool \$apop])

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.

vpopmail_set_user_quota

vpopmail_set_user_quota -- Sets a virtual user's quota

Description

bool **vpopmail_set_user_quota** (string *\$user*, string *\$domain*, string *\$quota*)

Warning
This function is <i>EXPERIMENTAL</i> . The behaviour of this function, its name, and surrounding documentation may change without notice in a future release of PHP. This function should be used at your own risk.

Warning
This function is currently not documented; only its argument list is available.
